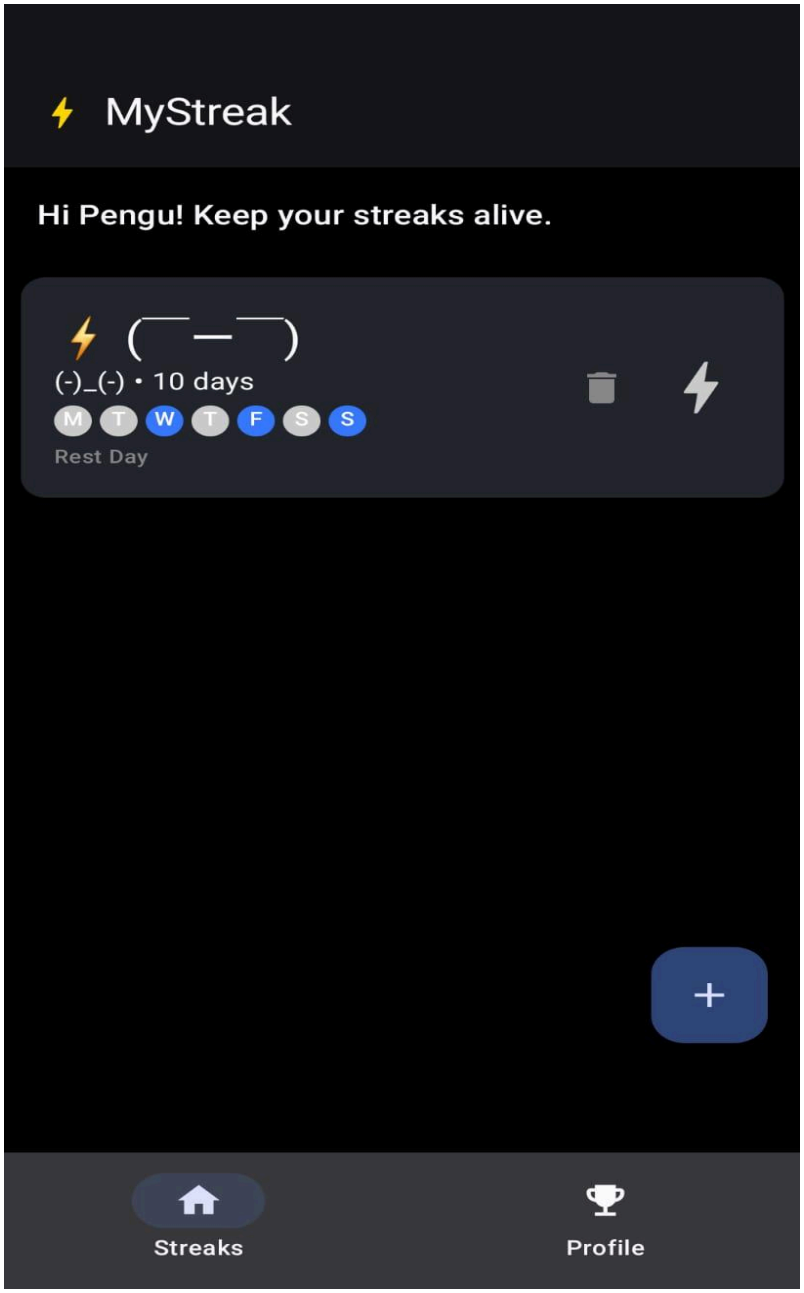
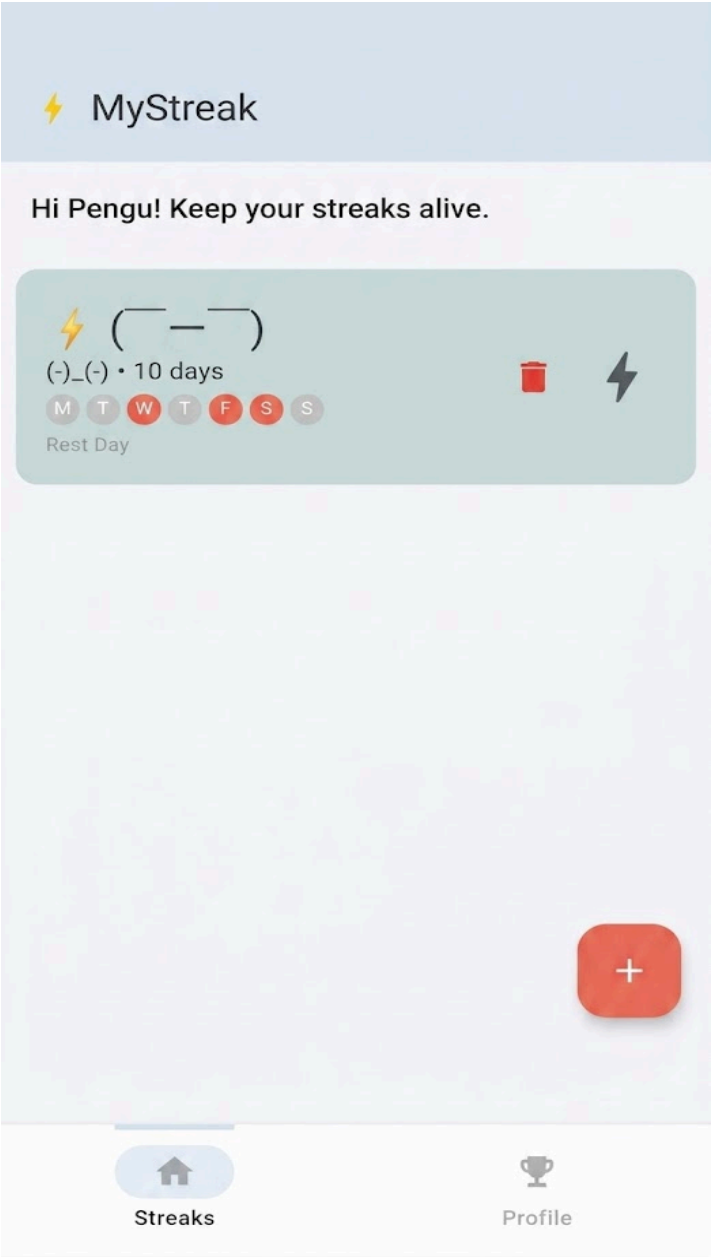
# Experiment 7

**AIM:** The aim is to trial different app layouts and color schemes and evaluate user feedback on aesthetics and usability using GIMP.





**PROCEDURE:**

Step 1: Install GIMP

• Download and install from the official website.

Step 2: Create a New Project

• Open GIMP

• Canvas Size: 1080 × 1920 pixels (standard mobile screen)

Step 3: Base Layout Design

1. Divide Sections:

o Use Rectangle Select Tool to define Header, Content Area, and Footer.
o Fill using Bucket Fill Tool with base colors.
2. Add UI Elements:
o Text Tool: For headings, button texts, and labels.
o Shape Tools: For buttons, input fields, image placeholders.
3. Layer Organization:
o Assign each UI component to a separate named layer:
▪ Example: Header, Button Login, Text Title, Input Field Email

Step 4: Create Colour Variants
1. Duplicate Layouts:
o Right-click on the project tab > Duplicate.
o Edit each with different colour schemes using Colorize Tool or Bucket Fill.
2. Save Layouts:
o File > Export As:
▪ Layout1.png
▪ Layout2.png
▪ Layout3.png
Step 5: Collecting User Feedback
Google Form Link:
https://forms.gle/sxuuHVgaTmMWeRKv6

Procedure:
• Shared all three layout images with users.
• Asked users to rate based on:
o Visual appeal
o Usability
o Readability
o Colour preference

User Feedback:
Layout 1:
• Simple layout with bold header and minimal UI •
Improve colour contrast
• Add button styling (e.g., shadow or depth)
Layout 2:
• Improved hierarchy with vibrant colour palette
• Slightly cluttered background, tight spacing
• Increase spacing between sections
Layout 3:
• Clean, minimal, professional layout with consistent spacing •
Keep design as-is

• Possibly apply theme customization options in final product

Step 6: Iterate and Refine

1. Refine the Design:

• Based on the feedback, make necessary adjustments to the layout and color scheme. • Experiment with additional variations if needed.

2. Final Testing:

• Conduct a final round of testing with the refined design to ensure usability and aesthetic satisfaction.

**Result :- Thus, the layout was made using GIMP successfully**
