Experiment 1

OLD UI DESIGN (BAD DESIGN)

Features & Drawbacks Identified

1. Flat & Dull UI

- The profile screen appears very simple and lacks visual appeal.
- No header image or background graphic is used.
- The plain background makes the interface look outdated and unengaging.
- The design does not attract users or encourage interaction.

2. Poor Profile Image Placement

- The item/profile image (Potato) is very small in size.
- It is placed inside a simple rectangular container.
- The image does not get enough visual importance.
- The placement looks old-fashioned and less professional.

3. Low Contrast & Readability Issues

- Light purple background with dark text creates low contrast.
- Text readability is reduced due to poor colour selection.
- Font sizes are inconsistent across headings and labels.
- Important information does not stand out clearly.

4. Poor Visual Hierarchy

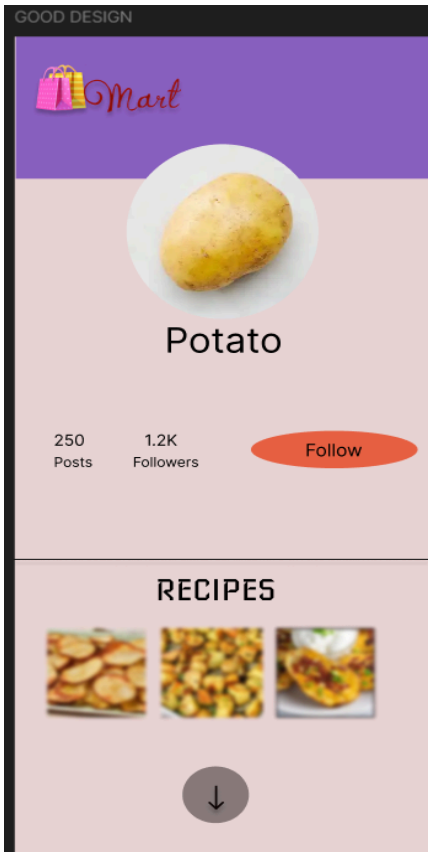
- The item name (“Potato”) and recipe titles are not visually distinguished.
- Headings and sub-content use similar font size and colour.
- No clear emphasis on important sections.
- Users may find it difficult to scan information quickly.

5. Unstructured Layout

- Recipes are displayed in a vertical single-column layout.
- No clear separation between different sections.
- Content looks cluttered and poorly organised.
- Navigation is not intuitive.

6. Single Column Recipe Display

- All recipes are stacked one below the other.
- The layout feels long and repetitive.
- Screen space is not efficiently utilised.



MODIFIED UI DESIGN (GOOD DESIGN)

Features & Enhancements

1. Header Background Section

- A coloured header section is added at the top.
- The header improves visual appeal and branding.
- Makes the profile screen look modern and attractive.

2. Profile Image Integration

- The potato image is displayed prominently in the centre.
- Circular image style gives a modern UI look.
- Image overlaps with the header section, improving aesthetics.
- The image size is increased for better visibility.

3. Improved Layout & Typography

- Proper spacing is used between elements.

- Text alignment is clean and symmetrical.
- Item name (“Potato”) is clearly highlighted.
- Fonts are consistent and readable.

4. Colour & Contrast Improvement

- Light background with dark text improves readability.
- Accent colours are used for buttons and highlights.
- Important information stands out clearly.
- Overall contrast is visually balanced.

5. Profile Statistics Display

- Posts count and Followers count are clearly displayed.
- Statistics are placed in a single row for better clarity.
- Makes information easy to understand at a glance.
- Improves user engagement.

6. Call-to-Action Button (Follow)

- A prominent “Follow” button is added.
- Button uses contrasting colour for visibility.
- Encourages user interaction.
- Button placement is easily accessible.

7. Structured Recipe Section

- Recipes are displayed in a grid layout.
- Images have uniform size and spacing.
- Layout looks clean and organised.
- Better use of screen space compared to single-column layout.

8. Improved Navigation Indicator

- A scroll-down indicator is provided.
- Helps users understand that more content is available.
- Enhances usability and user experience.
